

PRESS RELEASE

Singapore, 01 September 2004.

Exclusive Business Solutions is pleased to announce the launch of Exclusive Logistics Solutions, its first logistics services office in Sydney, Australia, with effect from today.

Exclusive Business Solutions consults to various global and regional organizations assisting them in launching into new markets, enhancing their revenue lines, streamlining their supply chain and increasing the efficiency and effectiveness within their sales and marketing environments.

"In an industry undergoing global consolidation and increased commoditization, the opportunity presents itself for the formation of a boutique business model focusing on highly personalized business relationships built from a foundation of customized process management, measurement and meaningful communication" said Derek Holmes, CEO of Exclusive Business Solutions.

Exclusive Logistics Solutions will offer international air and ocean freight forwarding, customs broking, logistics services and charter operations. More importantly is the way these services are offered to clients. Exclusive Logistics Solutions sets out to treat each and every client as an individual, to adapt to their independent way of operating and to establish and execute processes and measurement requirements directly related to the client's business.

One of the key strategic growth areas is China. China is Australia's third largest trading partner with total trade valued at AU\$25.2bn last year. Exclusive Logistics Solutions, in association with its Chinese partner, will establish its own office in Hong Kong in the forthcoming months.

"We are flexible, dynamic, efficient and personal," says Holmes. "Our hand-picked team members are globally acknowledged as leaders in their fields, but each one has a special and unique quality. They have passion. We do not move freight, cargo or parcels; we are care-takers of client's possessions in transit."
